<http://www.bikewanderer.com/on-the-road//gdmbr-canada>

<https://www.adventurecycling.org/routes-and-maps/adventure-cycling-route-network/great-divide-mountain-bike-route/>

“The Great Divide Mountain Bike Route (GDMBR) is Adventure Cycling's premier off-pavement cycling route, crisscrossing the Continental Divide north to south. This route is defined by the word "remote." Its remoteness equates with spectacular terrain and scenery. The entire route is basically dirt-road and mountain-pass riding every day. In total, it has over 200,000 feet of elevation gain.”

## <http://themountain.pickinio.com/bikes/honzo-al/>

[http://konaworld.com/honzo\\_al\\_dr.cfm](http://konaworld.com/honzo_al_dr.cfm)

“Do you love 29-inch big-wheeled bikes but always wanted something more aggressive than the XC-oriented offerings? This is why we made the ultra-aggressive, trailblazing, industry-changing Honzo AL. A progressive geometry gives the Honzo a ride that is comparable to full-suspension bikes but has all the familiar traits of

a sturdy and dependable hardtail. Time to ride!”

- Frame Material: Kona 6061 Aluminum Butted
- Wheel Size: 29
- Wheels: WTB SX25
- Front Suspension: 120mm
- Fork: RockShox Recon Silver RL 120mm
- Crankset: RaceFace Ride
- Drivetrain: Sram NX 1x 11spd
- Cockpit: Kona XC/BC bar and stem, Kona Race Light Log grips
- Brakes: Shimano Hydraulic
- Front Tire: Maxxis Ardent WB 29x2.4"
- Rear Tire: Maxxis Ardent WB 29x2.25"
- Saddle: Kona Trail

## <http://themountain.pickinio.com/bikes/shred-20/>

[http://konaworld.com/shred\\_20.cfm](http://konaworld.com/shred_20.cfm)

“When the ability to make quick turns and trail prowess is starting to develop, the Shred is the bike your future shredder should have at their disposal. Built to take abuse from any environment, whether it’s beat up neighborhood streets or some flowing trail, the Shred shines

when conditions are at their worst.”

- Frame Material: Kona 6061 Aluminum Butted
- Wheel Size: 20
- Wheels: Shinning MT20
- Front Suspension: 50mm
- Fork: Spinner Grind 1 50mm
- Crankset: FSA Vero
- Drivetrain: Shimano Tourney 6spd
- Cockpit: Kona OB bar and stem, Kona DJ grips
- Brakes: Tektro Novela Mechanical
- Front Tire: Schwalbe Little Jack 20x1.4"
- Rear Tire: Schwalbe Little Jack 20x1.4"
- Saddle: Kona DJ

<http://themountain.pickinio.com/bikes/operator/>

<http://konaworld.com/operator.cfm>

“The wildly successful Operator platform that we built for the masses is not lacking in performance. All the bike that Connor Fearon and Graham Agassiz expect to ride at the top level, but at a mere mortal price that allows us to ride without resorting to a PB&J diet.

Note: not compatible with tapered steer tube forks.”

- Frame Material: Kona DH 6061 Aluminum Butted 200mm Travel
- Wheel Size: 27.5
- Wheels: Sun Ringle MTX 33 Sleeved
- Suspension Platform: Beamer
- Front/Rear Suspension: 200mm/200mm
- Fork: RockShox Boxxer RC 200mm
- Shock: RockShox Kage R
- Crankset: RaceFace Chester
- Drivetrain: SRAM X7 9spd
- Cockpit: Kona DH bar, Kona Direct Mount stem, Kona S-LOG grips
- Brakes: SRAM Guide R
- Tires: Maxxis Minion DHF DH 27.5x2.5"
- Saddle: Kona DH

<http://themountain.pickinio.com/bikes/blast/>

<http://konaworld.com/blast.cfm>

“What makes hardtail mountain bikes so much fun? Is it the snappy aluminum frame and suspension fork that tame the toughest of trails? Maybe it’s the wide gear ranges and the fast rolling 27.5-inch wheels that make mole hills out of mountains. Whatever the combination is, we know you’ll have a Blast.”

- Frame Material: Kona Race Light 6061 Aluminum
- Wheel Size: 27.5
- Wheels: WTB SX23
- Front Suspension: 100mm
- Fork: RockShox 30 Silver TK 100mm
- Crankset: Shimano Alivio
- Drivetrain: Shimano Altus/Deore 9spd
- Cockpit: Kona XC/BC Riser bar and XC stem, Kona Race Light grips
- Brakes: Shimano Hydraulic Disc
- Front Tire: Maxxis Ardent 27.5x2.25"
- Rear Tire: Maxxis Crossmark 27.5x2.1"
- Saddle: Kona XC

<http://themountain.pickinio.com/bikes/mohala/>

<http://konaworld.com/mohala.cfm>

“The Mohala is designed around our female-specific geometry that is aggressive and confidence inspiring for those looking to push their riding skill further. Based around a 27.5-inch wheel that is known for its quick handling traits, the Mohala retains a good footprint that makes solid contact with the trail and boosts confidence. Spec’d with a RockShox fork, Deore hydraulic brakes and new 1x drivetrain, the Mohala is built like a Kona and is ready take leaps and bounds on the trail with you.”

- Frame Material: Kona Race Light 7005 Aluminum Butted
- Wheel Size: 27.5
- Wheels: WTB SX19
- Front Suspension: 100mm
- Fork: RockShox Recon Silver TK 100mm Tapered
- Crankset: SRAM NX 30t X-Sync
- Drivetrain: Sram NX 1x 11spd
- Cockpit: Kona XC/BC Riser bar and XC stem, Kona Lisa grips
- Brakes: Shimano Deore
- Front Tire: Maxxis Ikon 27.5x2.2"
- Rear Tire: Maxxis Ikon 27.5x2.2"
- Saddle: Kona Women's

<http://themountain.pickinio.com/bikes/makena/>

<http://konaworld.com/makena.cfm>

“No one wants to be frustrated with one of their first bikes, so we improved the geometry of the lightweight aluminum Makena and increased the standover clearance to make it easy for young riders to get off and on. And the easy to use 1x drivetrain with twist shifter makes gear changes easy. Just add a kid, and let the good times roll.”

- Frame Material: Kona 6061 Aluminum Butted
- Wheel Size: 20
- Wheels: Shining Alloy
- Front Suspension: 30mm
- Fork: CH 510 30mm
- Crankset: ProWheel 140mm
- Drivetrain: Shimano 7spd
- Cockpit: Kona Riser bar, Kona Control stem, Velo Junior grips
- Brakes: Tektro V-Brake
- Front Tire: Kenda Kwik 20x2.0"
- Rear Tire: Kenda Kwik 20x2.0"
- Saddle: Velo Junior

<https://www.bikerumor.com/2015/07/16/maglock-is-back-with-a-lighter-cheaper-and-more-refined-version-of-their-magnetic-pedals/>

<http://themountain.pickinio.com/parts/pedals/pd-mx80/>

<http://mountainbikesreviews.net/shimano-pd-mx80-saint-pedals/>

“The Shimano PD-MX80 Saint Pedals looks tough and nice once unboxed and the finish and design is top notch. They attach to shoes very easy and make pedals that come clipless redundant for walking around even in rainy conditions. The axles on this pedal are awesome and now, bikers can easily change pins instead of being stuck with unusable pedals. Nice technology from Shimano. This pedal model definitely comes recommended to every serious biker looking for a top quality product

that functions excellently.”

- The platform is designed in a concave shape to allow for efficiency when pedalling as well as to ensure comfort during long rides.
- Pins that are replaceable
- Durable axle that has been proven by users to deliver quality performance
- Comes with a lower profile reduced by eight five millimetres and wider by three millimetres as compared to older model.

<http://themountain.pickinio.com/parts/pedals/mg-1/>

<http://mountainbikesreviews.net/wellgo-mg-1-magnesium-sealed-pedal/>

“The Wellgo MG-1 Magnesium Sealed Pedal is an excellent pedal that comes with efficiency and a durable look. It comes with beautifully designed metal studs that are replaceable. They are very versatile in their use and can attach to any kind of bike.

With a fifteen millimeter wrench, you can install the pedals. The installation is very easy as the wrench is used for the shaft of the pedals. When fixing the left pedal, note that it is reverse threaded and adequate care should be taken when installing to prevent wearing the threaded part.

The pedals come with very smooth and nice bearing surfaces that are well sealed and it works well to reduce friction. They are ultra light and provide a firmer gripping surface. The pins are adequate and they do a good job of preventing the pedals from slipping off.

The pedals are not very free to spin, however it does not change position too often and stays fixed offering a quicker pedalling. The serrated parts of the pedals are excellent as they provide superb traction and won't slip easily when biking. It also comes with slots for mounting reflectors which is a nice addition.”

- Superb color for the body which comes in a magnesium themed paint scheme.
- Utilizes a very durable cromoly spindle.
- Comes with MG -1 bearing surfaces that are DU/Sealed

<http://themountain.pickinio.com/parts/pedals/wellgo/>

<http://mountainbikesreviews.net/wellgo-multi-function-mountain-bike-pedals/>

“These pedals are built tough and works well for a better and seamless pedaling experience. They can be utilized as platform pedals if all you want to do is short ride around town. They come with rubberized grips that hold tightly and if you want to push them to the limits of more intense biking, then it is better paired with SPD shoes and together with clips, you can ride hard and long as you like and this pedal will take the heat.

For short rides around the neighborhood, use them as a platform pedal. The rubber grips hold well. For more intense rides, break out the SPD shoes, get clipped in & ride as long & hard as you want.

The quality in the build is top notch and the adjusting mechanism for the cleats functions well and holds up nicely. Ensure that the spindle of your bike can attach with 9/16 inches threads for seamless attachments.

Generally, these pedals functions well and can be utilized according to rider’s preference. It’s an inexpensive recommendation for a much more engaging ride.”

- Can be utilized as a biking shoe as well as for casual strolling.
- Made from an aluminium material with a silver barrel, together with a caging made from black aluminium
- Uses a cromoly Spindle, together with ball bearing for durability and added support.
- Uses the cleats from Wellgo (which comes included) or a Shimano cleat (which can be bought separately).
- Designed with 9/16” inches tread size and light weight at three hundred and seventy grams.
- Bundled in package with two pedals together with cleats.

<http://themountain.pickinio.com/parts/pedals/maglock/>

<https://www.bikerumor.com/2015/07/16/maglock-is-back-with-a-lighter-cheaper-and-more-refined-version-of-their-magnetic-pedals/>

“MagLOCK pedals still use a simple rectangular cleat that is SPD compatible. Attraction force can be tuned from nothing to 30-35lbs to allow those unfamiliar with clipless pedals to increase the force as they get more used to the concept. To “unclip” from the

pedals, riders simply need to pronate their foot rather than twisting – a motion that MagLOCK claims is more natural when a rider is about to fall. Because of that, the pedals have infinite float. Of course you can just jump on with your street shoes and pedal as normal – assuming they’re not steel toe boots or something...”

[http://konaworld.com/shonky\\_frame.cfm](http://konaworld.com/shonky_frame.cfm)

“The perfect hardtail is all about balancing geometry, performance and durability. It has to feel just right and take a serious beating, without breaking the bank—a smashable work of art, so to speak. With direct feedback from Aggy, the popular Shonky is back again in 2017: aluminum frame, long top tubes, sliding dropouts and a tapered head tube make this a jump-shredding machine.”

- Frame Material: Kona DH 6061 Aluminum Butted frame
- Wheel Size: 26
- Front/Rear Suspension: 100mm

<http://themountain.pickinio.com/parts/frames/esatto-ti/>

[http://konaworld.com/esatto\\_ti\\_disc\\_frame.cfm](http://konaworld.com/esatto_ti_disc_frame.cfm)

“It doesn’t get more exact than Titanium—the Cadillac of road frames. From perfect pavement to rough and tumble back roads. It all comes alive with our Road Endurance geometry and frame features that include serious tire clearance and tapered head tube, giving you a road frame that rules every road surface. Shimano flat mount disc design and 12x142mm rear dropout.”

- Seamless 3-2.5 Titanium
- Road Endurance geometry
- Flat mount disc frame and fork
- 15x100mm front and 12x142 rear thru-axles
- Hand made in the USA by Lynskey Performance Designs

<http://themountain.pickinio.com/parts/frames/honzo-st/>

[http://konaworld.com/honzo\\_st\\_frame.cfm](http://konaworld.com/honzo_st_frame.cfm)

“The sweet ride feel of steel comes alive in this lovingly crafted, wildy aggressive hard tail mountain bike. Think of it as a Process 111 without the rear travel. A slack 68-degree head tube angle, low bottom bracket and shortest-in-class chainstays, with a super-low top tube for great standover, the Honzo is all about confidence in the hairiest of situations.”

- Kona Cromoly Butted frame
- Improved geometry to match Process bikes
- Modular dropout system
- Tapered head tube
- 31.6 dropper compatible with Stealth routing

“Ditch the city for the solace of twisty singletrack and expansive horizons with the Dakine Men's Range Jersey. As its name suggests, the Range caters to riders venturing deep into the mountains in search of the best trails. Its tailored fit reduces overall bagginess, but without sacrificing freedom and flexibility on the trail. Quick dry polyester pulls perspiration off your skin for a cool-wearing feel when you're slogging up steep climbs. Mesh panels along the underarms and back reduce perspiration build-up, especially when you're wearing a hydration pack. Its crew neck features an integrated zipper for increased ventilation through oppressive heat. Plus, there's even a soft wipe along the bottom of the jersey for cleaning smudged shades.”

<http://themountain.pickinio.com/parts/clothing/indicator/>

<http://www.backcountry.com/fox-racing-indicator-bike-jersey-mens-fxr01bo?skid=FXR01BO-HEGRE-S&ti=UExQIFJ1bGUgQmFzZWQ6TW91bnRhaW4gQmlrZSBDbG90aGluZzoXOjI6>

“With a ton of hot-weather jerseys on the market, it's tough to find one with the understated style and subtle good looks of the Fox Racing Indicator Jersey. Most manufacturers design a jersey, then design it some more, then keep designing it without knowing when to quit. With the Indicator, we think Fox got it just right.

Fox Racing built the Indicator Jersey with moisture-wicking polyester fabric that keeps you dry and cool while you ride. Open mesh panels add breathability and increase airflow, as well as adding moisture-wicking efficiency. Fox also gave the Indicator Jersey a drop tail to cover you while you're in the riding position, a built-in optics wipe, and raglan sleeves that provide loads of mobility with no restriction.”

<http://themountain.pickinio.com/parts/clothing/ranger/>

<http://www.backcountry.com/fox-racing-ranger-cargo-12in-shorts-mens-fxr01bq?skid=FXR01BQ-CH-S32&ti=UExQIFJ1bGUgQmFzZWQ6TW91bnRhaW4gQmlrZSBDbG90aGl uZzoxOjQ6>

“Don't let the Ranger Cargos' mellow, off-trail presence mislead you, as Fox Racing's mountain-bike aptitude is abundant in these ride anything, ride anywhere shorts. From lush northern forests to desert singletrack, the Ranger Cargos' two-way stretch poly shell ensures cool, dry comfort and unlimited range of motion.

Out on the trail, Fox treats you to a six-panel, moisture-wicking, and breathable liner with Pro Form chamois, which provides not only support, but relief from irritation, too. The anatomic liner is detachable, allowing you to pair it with knickers and pants for cooler climates; and best of all, the Rangers turn into a pair of technical shorts for travels between trailheads.

As for storage space, the Ranger Cargos have plenty; this includes two pedal-friendly hand pockets for quick access to electronic devices, one zipped cargo for secure storage, and a flapped cargo for streamlined convenience to nutrition.”

<http://www.backcountry.com/marmot-limelight-tent-2-person-3-season?skid=MAR00SX-X001-Y001&ti=UExQIENhdDo6OjY6>

“Give yourself a little extra headroom with the Marmot Limelight 2P Two-Person Three-Season Tent. Made with Marmot's Zone Construction, the Limelight 2P has a smart design that maximizes space, so you have plenty of room to kick back, relax, and play a quick game of cards with your tent mate after a long day spent hiking, climbing, or mountain biking.

Marmot gave the Limelight everything it needs to withstand the elements, like a durable 68D polyester rain fly with fully taped seams, stout DAC Pressfit aluminum poles, and a footprint to protect the tent's floor from wear and water. This particular version of the Limelight sleeps two and has two vestibules, giving you and your tent mate plenty of space to store gear out of the rain, and it comes with color coded clips and poles to make set up as painless as possible. Marmot also added a large double door and 1 rear D-shaped door to make getting gear in and out of the tent simple and convenient.”

- A burly camping and backpacking tent built for foul weather
- Two-person sleeping capacity with space-maximizing design
- Waterproof fly and floor with taped seams with a PU coating
- No-see-um mesh canopy keeps biting bugs at bay
- DAC Pressfit aluminum poles withstand wind and wear
- Super-sized double door and D-shaped rear door
- Color-coded clips and poles for easy pitching
- Footprint included for fast-pitch option
